The principal physical laws characterizing the behavior and interaction of electric and magnetic fields were unified in the comprehensive theory of electromagnetic fields by James Maxwell in his Treatise on Electromagnetism, first published in 1873 (Maxwell, 1954). The formulation of this theory represents one of the most important events in physics since Newton's time.

Comprehensive theory: social action according to Weber For Weber, social action is the meaning that a subject gives to his behavior in relation to the behavior of other people. This means that individual behavior, in some way, is determined by the behavior of other people, a concept that clearly explains the phenomenon of social imitation.
