### Guidelines For The Civil Construction

The civil construction industry provides the built infrastructure that underpins community and business services such as roads, water and sewerage, pipelines, bridges, marine structures, residential and commercial subdivisions and related earthworks. While civil construction activities are a precursor to most building (residential and non-residential) works, there is little commonality in practices between civil and building construction works.

### GUIDELINES FOR THE CIVIL CONSTRUCTION INDUSTRY

Civil engineers design, build, supervise, operate, and maintain construction projects and systems in the public and private sector, including roads, buildings, airports, tunnels, dams, bridges, and systems for water supply and sewage treatment. Many civil engineers work in design, construction, research, and education.
