### How To Use Guide Coat

A guide coat is a light misting of paint or primer in a contrasting color above each coat of primer. I use rattle-can "sandable primer." In Figure 1 you can see that the guide coat (black) is misted over the primer coat (grey). The purpose of this coat will become obvious as you begin to sand the primer. Next time we'll go over the process of sanding down this guide coat and you'll see exactly what function the guide coat serves.

### Block Sanding BONDO-Using A Guide Coat - YouTube

Typically we use a black guide coat over the gray primer. After the guide coat is applied, we will use long sanding blocks to sand the guide coat off. What will happen is that the guide coat will sand off of the high spots, and will stay in place in any low spots. This will allow us to see any imperfections. If the low spots are low enough we will use a glaze to very lightly build up the surface. Then we will prime, sand and guide coat again.

### What is a Guide Coat - Renown Auto Restoration Blog

The process of guide coat is fairly simple. Typically you do your body filler and seal the repairs with gray primer. From there you can apply a contrasting color guide coat (usually black over gray primer or tan guide coat over black primer). The guide coat is misted onto the surface leaving a spotty looking finish.

Powder is ideal to highlight body lines 3M™ Dry Guide Coat is used to identify surface imperfections such as pinholes in body filler and deep scratches in primer. Unlike liquid and aerosol guide coats, Dry Guide Coat requires no masking before use, and there is no dry time after application.

### 3M™ Dry Guide Coat | 3M United States

A guide coat is a thin mist of colour applied over high build primer and then wet flatted off. Initial sanding will remove the high points, and it is only when the whole of the guide coat has been removed that the high points of the panel will be level with the low points - then the surface will be completely smooth and ready for top coating.

### Car Primers and Guide Coat Flattng

This operation removes any surface oxidation and opens up the primer to accept the next coat. Apply the second coat of primer the same way you applied the first, but this time you will notice there are fewer imperfections. Once the second coat of primer is cured, apply your guide coat. I sand my second coat of primer with 600 grit wet sandpaper.

### How to Use a Guide Coat - Part II — WHITE GLOVE FANS

Now I use SEM guide coat because it's so easy and inexpensive that it doesn't pay to mess with a gun. Maybe if I was sanding on primer everyday for a living I may go back to using a gun but for the once a week primer sanding the SEM aerosol works great and one can lasts me a couple months.

### Guide coat paint?

If you use a guide coat on the filler before priming you shouldn't have to fill over primer. I have watched an old school body man straighten out my '37 Ford coupe and these guys can feel with their hands to find high and low spots.

The applicator has flexible edges which makes it easy to use on contoured areas. This is a great tool in guiding the operator through the sanding ...

### Dry Guide Coats

Many thin coats of mud will give you better results, but patience is required to let it dry. Don't apply any mud over freshly taped joints. Allow them to thoroughly dry for one day between coats unless you are using hot mud that will dry in an hour. A great idea is to use pink mud that dries white, indicating it is ready for another coat.
