Nissan Engine Problems

Nissan QG18DE Engine Problems and Reliability 1. The engine consumes too much oil. That is the unique feature of that engine. Usually, consumption is up to 0.5 liters per 600 miles (1,000 km). If it is around 1 liter, you should contact with service or auto repair shop. 2. There is a problem with the idle valve gasket. Eventually, antifreeze starts leaking directly into the engine control unit.
