Bow of a boat. Refers to the forward part of a pleasure craft.

Stern of a boat. Refers to the back end of a pleasure craft.

Starboard side. The right side of a pleasure craft when looking forward. Many centuries ago, ships were always moored on the left side; the helm was on the right side and would have been a hinderance while mooring.

Parts of a boat - Bow, stern, starboard, port, draft ...

The common sailboat comprises eight essential parts: hull, tiller, rudder, mainsail, mast, boom, jib and keel. The hull is the shell of the boat, which contains all the internal components. Its symmetrical shape balances the sailboat and reduces drag, or the backward pull caused by friction, as it moves in the water. Inside of the hull in the stern, or back of the boat, is the tiller, which is ...

Basic Parts of a Sailboat - Sailboat Parts | HowStuffWorks

A sailboat is a boat that is propelled either partly or entirely by sails. Sailing is popular in many destinations around the world. For example, Bahamas catamaran charters are a time-honored tradition in the Caribbean, and in the Mediterranean, sailing is a way of life. There are several different types of sailboats and what constitutes a sailboat varies by maritime culture and region.

It's your go-to dictionary for #everythingboats: From boat parts to boat type, and every action command you'll need out on the water. By Gary Reich. March 10, 2020 "Look over there, under the gunwale," says the skipper to a guest who needs a boat hook to help snare a mooring line.

Beginner's Guide to Boat Terminology - boats.com

Below the Waterline: The Chine. How your boat handles and the speed at which it can move both depend in part on the chine, which is the shape of the portion of the hull of a boat that sits below the waterline. The shape is determined by the change in angle in the cross-section of the hull.. If the chine is rounded, or its angles are shallow, it is called a soft chine; if it is squared off, it ...
